

PCD268 Diffuser Plates 8th September 2023 – by John Lockwood

Instructions Compiled by June Smith

On John Video dated 8th September 2023, he demonstrates how to use the new Diffuser Plates and 3D Embossing Folders. I would advise that you visit it as well as following these instructions.

If you are using a different die cutting machine please read the compiled list of the makes and model etc. which will be available shortly.

Information:

1. The 7 new Craft Artist Diffuser 2mm Acrylic Plates are as follows:
2. Strip - Inner & Outer Square - Inner & Outer Oval - Inner & Outer Circle.
3. The 4 new 3D Embossing Folders are all 6" x 6".
4. John is using the Kaleido.

The Plates will work with any normal or 3D Embossing Folders in your collection.

Materials

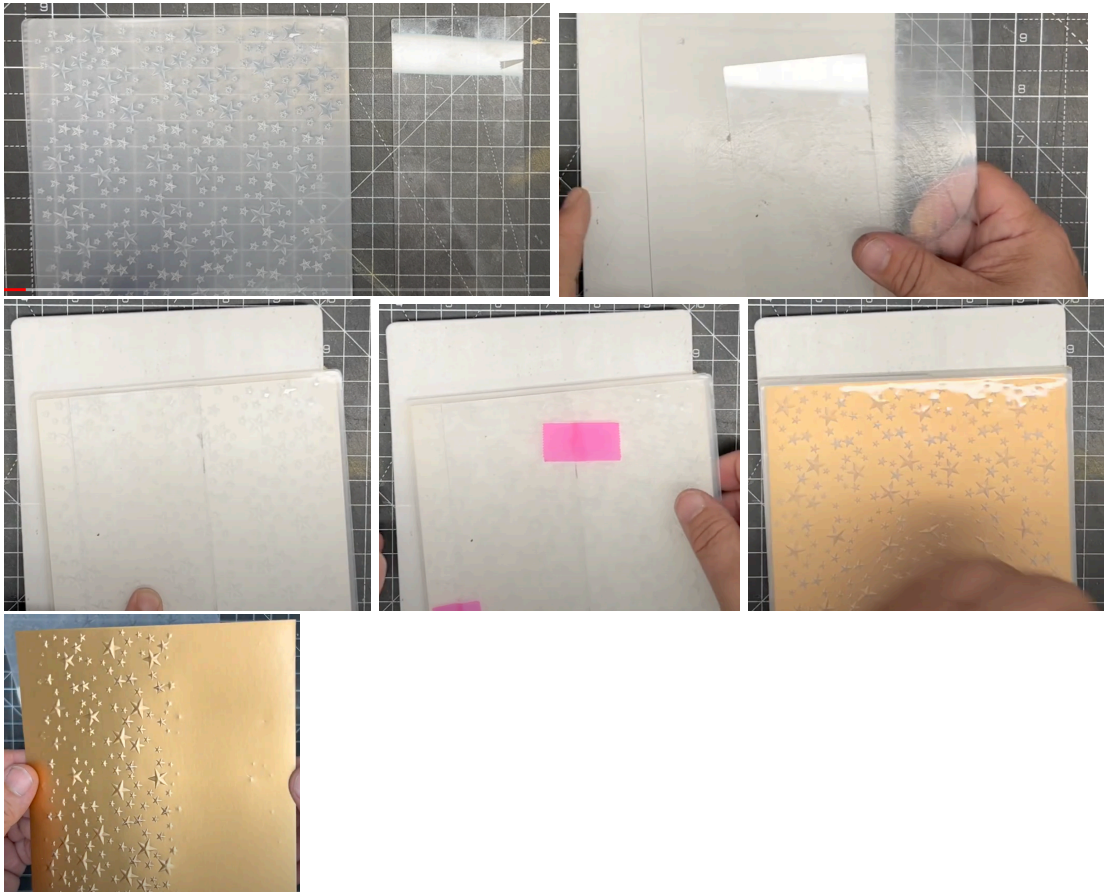

Diffuser Plates Set PCD268 (7 all 2mm)
Snow Flurry 3D Embossing Folder JND424
Stag 3D Embossing Folder JND425
Twinkle Stars 3D Embossing Folder JND426
Elegant Holly 3D Embossing Folder JND427
Kaleido A5 Die Cutting Machine
Gold & Silver Satin Cardstock

Pink Repositionable Tape
Craft Kit

Method:

Strip Diffuser Plate, Twinkle Stars 3D Embossing Folder & Kaleido:

- To emboss you would normally use the white base plate and the 5mm plate. However, when you use the new 2mm Diffuser Plates you will only need the 3mm plate (which totals 5mm).
- Take the Twinkle Stars embossing folder and place a 5 $\frac{3}{4}$ " x 5 $\frac{3}{4}$ " piece of Gold Satin Card in the middle, close the folder. Turn it over onto your base plate and then place the strip on top where you want it to be embossed. It is always advisable to add a couple of strips of the pink repositionable tape onto it to secure it in place. Turn the folder back over and add the 3mm plate on top, then run through your die cutting machine, you will notice that it will only emboss where the plate is.

Outer Circle Diffuser Plate & Stag Embossing Folder JND425:

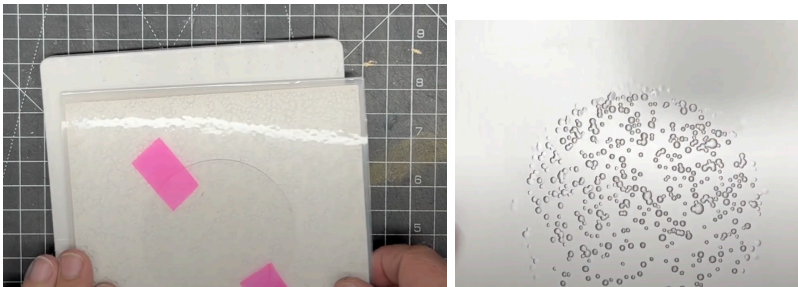

- We will repeat the process as above but this time using the Silver Satin Card. Open the folder and check which is the raised area, place your card into the middle, close the lid, turn it over and place the circle plate on to it, you can adjust the plate until the circle is in exactly in the right place, tape it down, add your 3mm plate on top and run through your machine. When you open it up

you will see that the stag is missing from the middle, but you have the beautifully embossed outline of the circle in the middle.

Inner Circle Diffuser Plate. Snow Flurry Embossing Folder JND424:

- Again, repeat the process, this time add the inner circle plate, it is up to you where you place it, either centre or off centre. Tape it down, turn it over, add your 3mm plate and run through your machine.

Your creation is now complete. I hope you have enjoyed these instructions.
