

JND630 Snowflake Squares – 21st Birthday Card – 1 September 2026 - by John Lockwood

Instructions by June Smith

John has created a 'You Tube Video' dated 1 September 2026, using JND630 Snowflake Squares die set, JND608 Edelweiss, & JND602 Birthday Numbers, where he demonstrates how to make this beautiful card above. I would advise that you visit it as well as following these instructions.

Information:

Unfortunately, I don't have the dies to give you the measurement of each die in the Snowflake Squares set.

JND630 Snowflake Squares

Die 1: 6" x 6" Rickrack Beading Edger Square Frame with stitched detail inside

Die 2: 5½" x 5½" Double Stitched Frame with 5 different apertures inside (this die does not cut out)

Die 3: top left Stitched Rectangle

Die 4 Bottom left stitched square

Die 5: Large stitched Snowflake which fits inside die no: 2

Die 6: Stitched Tall Rectangle

Die 7: Tall Thin Stitched Rectangle that fits inside die no: 2

Die 8: Five Horizontal Snowflakes that fit inside die no: 7

Die 9: Tiny Stitched Snowflakes that fits inside the bottom right of die no 2

Dies 10: Tiny Single Snowflake that fits inside die no 9:

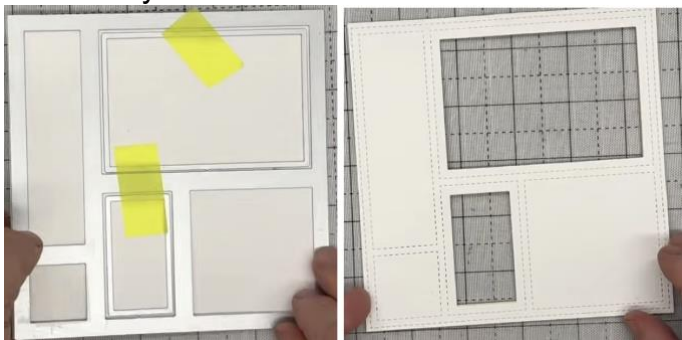

Materials:

7½" x 7½" Top Folding Card Blank
 JND630 Snowflake Squares (10)
 JND608 Edelweiss Die
 JND602 Birthday Numbers Die
 Coconut White Card
 Canvas Card – Lilacs, Lavender
 3M Display Mount Spray Adhesive
 Silver Stick on Pearls
 Die Cutting Machine
 Craft Kit

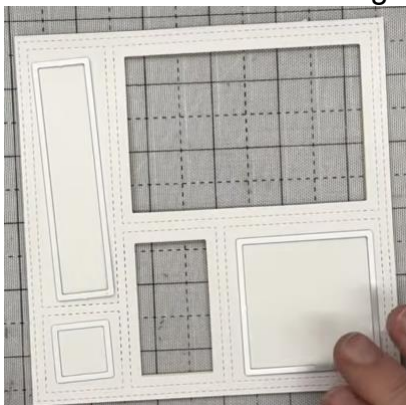

Method:

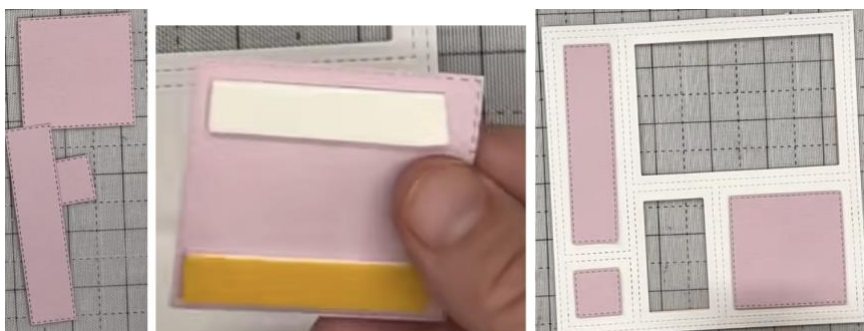

- Take a piece of Coconut white card and cut this to 5½" x 5½" and we then want to position die no: 2 Double Stitched Frame with 5 different apertures inside evenly into the middle and tape this down. Then take Die 3: Stitched Rectangle and Die 6: Stitched Tall Rectangle and tape these down, then run this through your die cutting machine, and you get this stitched detail all the way around the outside and also around the 5 different pieces below.

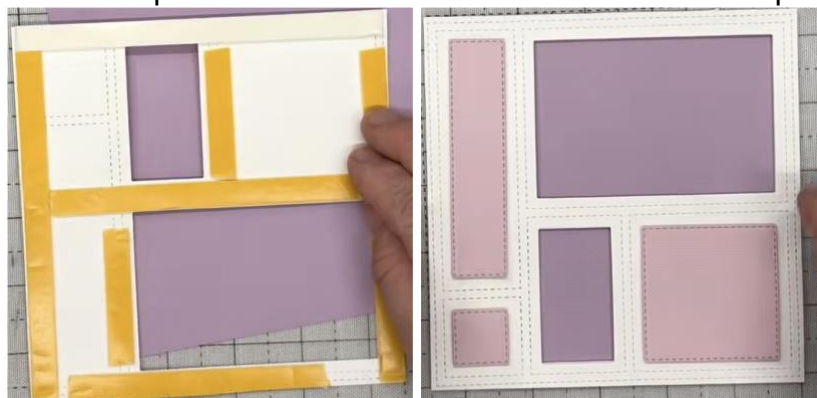

- Then take Die no: 4 Bottom left stitched square and tape that down onto the bottom right square, also Die 7: Tall Thin Stitched Rectangle that fits inside die no: 2 and the very small square, Die 9: Tiny Stitched Snowflakes that fits inside the bottom right of die no 2.

- Then from the Lilac Co-ordinations card tape down die no: 4, 7 and 9 again and cut them out. Then add foam tape onto the back of these 3 pieces and add them onto the coconut white frame. Turn this over and add foam tape around the back.

- Next we want to cut a 5½" x 5½" piece of the Lavender card, take the white piece and remove the backing from the foam tape, then add this straight onto the Lavender square, you will notice that the width of all the dies in the set are wide enough to take our standard 10mm foam tape, which is a lot easier to use rather than cutting about the foam tape to make it work on your frame. Then with the sticky frame still face upwards, take the Lavender square and add this evenly onto the foam tape, turn it over and your piece should look like the photo below with the mix of colours and shapes.

- Then take die no: 1 in the set and cut this out of the Lilac Co-ordinations card. Then add wet glue onto the back of your main piece and add this onto the Lilac card which has that beautiful stitched points all the way around. This die set was designed so that all the inserts like the Haberdashery dies, and many others will work perfectly into these squares and rectangles.
- Take some more foam tape and add this onto the back, then remove the yellow backing and add this onto a 7½" x 7½" top folding card blank which has a layer of the lilac card which it looks like 7¼" x 7¼" and a 7" x 7" layer of Coconut White card and adhere this onto the front.

- As this is a 21st Birthday card, John has cut out the 2 & 1 dies and the TODAY die and also the BIRTHDAY die out of the lavender card,

- Then for speed John is using 3M Display Mount Spray Adhesive and a spray box, you could use glue glaze if you prefer. It is easier if you have a pair of pointed tweezers to pick up each of the numbers and letters and place them evenly onto the relevant area on your card.

- John has already cut some of the JND608 Edelweiss and has added glue gel onto a cocktail stick and adhered these onto the card.

Your creation is now complete. I hope you have enjoyed these instructions.
