

JND624 Starburst – Silver Card – 21 September 2026 - by John Lockwood

Instructions by June Smith

John has created a 'You Tube Video' dated 21 September 2026, using JND624 Starburst die set, where he demonstrates how to make this beautiful card above. I would advise that you visit it as well as following these instructions.

Information:

This is the largest Card you can make from A3 card.

Die No: 1 – Stitched Rectangle Die

Die No: 2 - Decorative Inside Frame with an Oval cut from the middle

Die No: 3 – Stitched Oval Die

Die No: 4 – Stitched Circle with Swirl Patterns at the top and bottom

Die No: 5 – Stitched Circle

Die No: 6 – Smaller Stitched Circle

Die No: 7 – Stitched Star

Materials:

From an A3 card create an 8¼" x 6¼" card base.

JND624 Starburst Die (7)

Presscut Plain Rectangles (die no: 4 - 7½" x 5½" x and die No: 5 - 7¼" x 5¼")

CA Essential White Card

Silver Satin Card

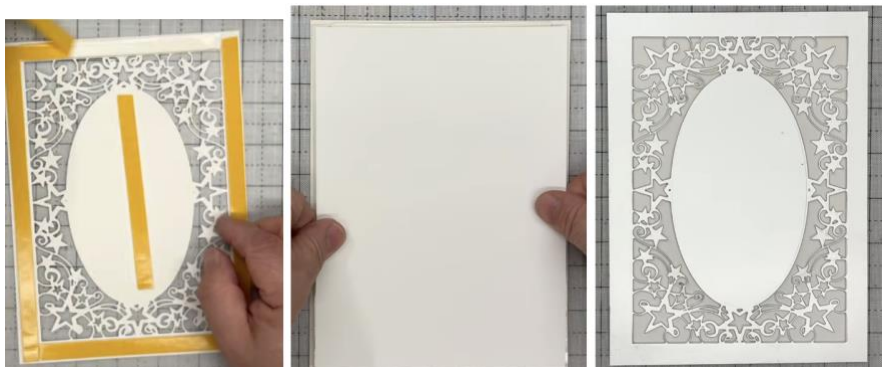

Silver Mirror Card
Die Cutting Machine
Craft Kit

Method:

- Take an A5 piece of Silver Satin Card and trim this down to 5 $\frac{3}{4}$ " x 7 $\frac{3}{4}$ ". Then add die No: 2 and place this onto the front of the card, tape it down and run through your die cutting machine, if you put the die on your cutting plate at an angle, you will find that it cuts out easier. Another tip is to rub the back of your dies with a tumble dryer sheet, and this gets rid of any debris left over from the manufacture of the dies, this applies to all makes of dies and because this is a very detailed die you will see that it all cuts out perfectly.
- Use you 4-in-1 tool to remove all the waste pieces but keep the stars that fall out of the die into a little pot as you can use them on any card.

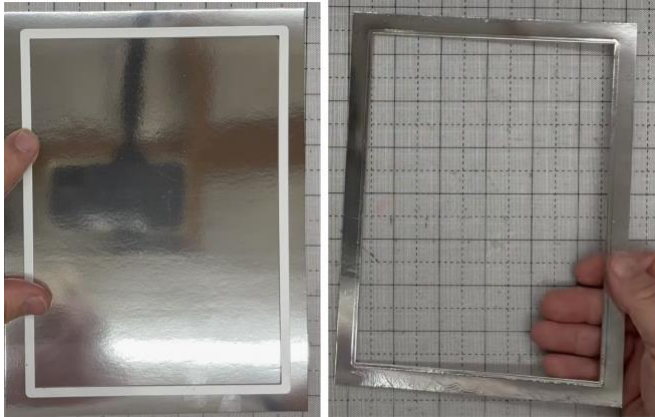

- John has already removed all the waste pieces and added foam tape onto the back, then remove the backing and bring in a piece of Coconut White card cut to 5 $\frac{1}{4}$ " x 7 $\frac{1}{4}$ " add the white card face down onto the foam tape.

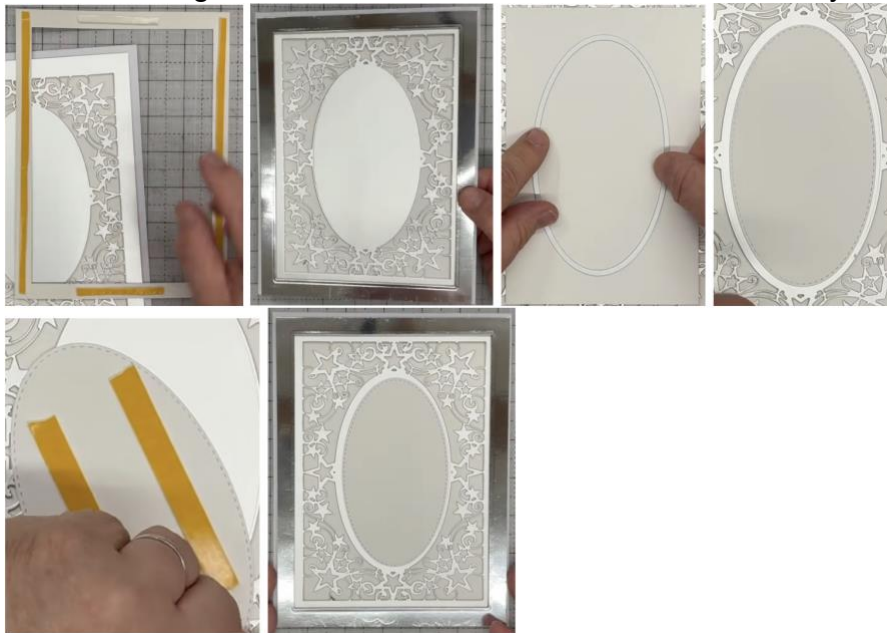

- Turn the card over and add super tacky wet glue onto the back and adhere this onto a 6 $\frac{1}{4}$ " x 8 $\frac{1}{4}$ " top folding card blank.

- Then take a piece of Silver Mirror card and cut this to 6" x 8" then tape down Die No: 1 – Stitched Rectangle Die, then run this through your die cutting machine. This then gives you a frame below.

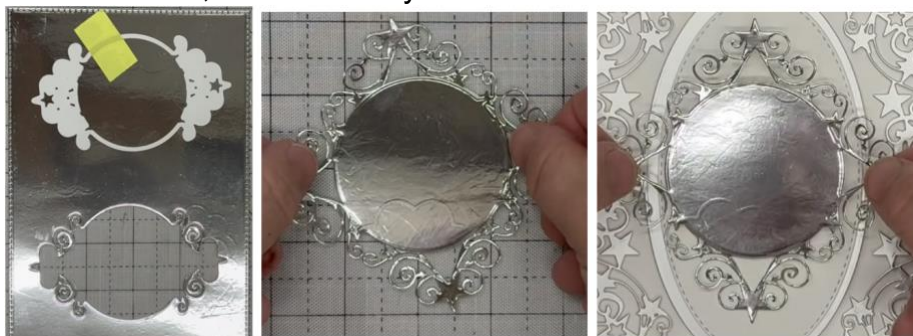

- Turn your narrow Silver Mirror frame over and add foam tape around the outside, this is quite narrow, so it is easier to take your scissors and cut the foam tape up the middle. Remove the yellow backing and add the frame onto the front of the card.
- Next take a piece of coconut white card and tape down Die No: 3 – Stitched Oval Die, then run this through your die cutting machine, then add foam tape onto the back in 2 places, not straight down the middle though, remove the backing and add the Stitched Oval onto the front of your card.

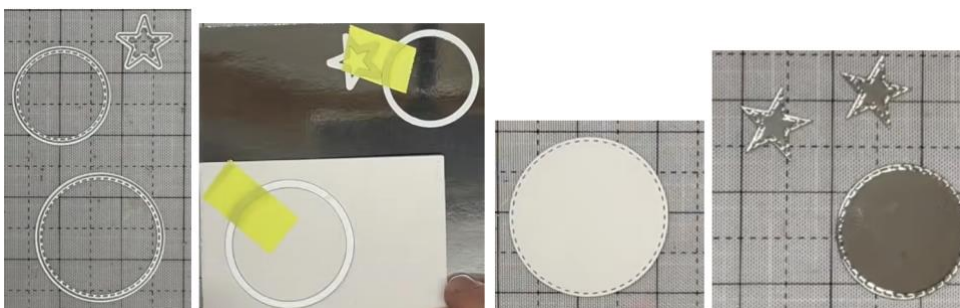

- Then take the inside waste piece and cut out from Die No: 4 – Stitched Circle with Swirl Patterns at the top and bottom and cut this out twice. This is a very delicate die which is based on the starburst corners, so be careful when you're removing the card from the die.
- What we then want to do is to adhere these together, so turn one of them over and add wet glue onto the back then turn the die cut and add this over the other silver mirror piece so you have the delicate outside swirls in all 4 sides. Then add a piece of foam in 2 places on the back, remove the backing and

add this onto the front of the oval, so you are matching the stars pointing to all 4 sides, so it is exactly into the centre..

- Then take Die No: 5 – Stitched Circle, Die No: 6 – Smaller Stitched Circle and Die No: 7 – Stitched Star. Take a piece of Coconut White Card and tape down the larger circle, and for the smaller circle and the star add these to a piece of silver mirror card, then die cut these. You need to cut another star out as well.

- On the back of the silver circle, add a piece of foam tape, remove the backing and add this onto the front of your card. Then take the silver circle and add foam tape onto the back, remove the backing and add this onto the stitched white circle. Then add a bit of glue glaze onto the back of a silver star

- You can then add a small sentiment into the middle of the circle, it is your choice if you wanted to do this. If you look at the original card that John made, he had cut out 'HAPPY' from silver mirror card and added this into the centre of the card.

Your creation is now complete. I hope you have enjoyed these instructions.
